Subject: ECE 39595J -- Partners and Project Step 4 and Step 5

First, check Brightspace, and if your partner is not listed in the Partner column of grades, send me email with your name and your partners name. If you in the Java class make the subject "ECE 39595J Partner", and if you are in the C++ class make the subject "ECE 39595C Partner".

 The final project steps have been posted to Brightspace. Step 4 is due the Sunday after Thanksgiving. I went back and forth on having it due the Tuesday before Thanksgiving, but I figured if you needed the time, you have it, and if you don't need the time, you can get it done on Tuesday.

Step 5 is due December 5, a Saturday and the last official day of classes. It has no new requirements over Step 4, and so if you are happy with Step 4, you should not turn in Step 5 and your Step 4 grade will also be your Step 5 grade.

There is extra credit available for an early turn-in of Step 4. 1.2 points will be added per day to your project grade for each day you are early, up to 5 days. Thus, turning in your project the Tuesday before Thanksgiving will get you six points, Wednesday 4.8, and so forth. My hope is that we can get some projects in early and make it possible to get more graded so that more of you know if you should be happy with your Step 4 grade, or not.
